Professional Summary

Innovative Full Stack Developer with over 3 years of experience specializing in blockchain technology, fintech solutions, and accessible web applications. Proven ability to design and implement secure, scalable, and user-centric applications using React, TypeScript, Node.js, and Solidity. Demonstrated success in enhancing user adoption and business performance through transparent voting systems and responsive interfaces.

Technical Skills

Frontend Development: React.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML5, CSS3
Backend Development: Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT Authentication
Blockchain Technology: Solidity, Ethereum, Web3.js, Smart Contracts, DApp Development
Database Management: MongoDB, PostgreSQL, Firebase, Redis
DevOps & Tools: Git, GitHub, Docker, AWS, CI/CD
UI/UX Design: Figma, Responsive Design, WCAG Accessibility
Languages: English (Professional), Swahili (Native)

Professional Experience

Software Developer Intern
Neverest Ltd under TAWA INNOVATE LIMITED | Nairobi, Kenya
June 2023 – December 2023

- Enhanced TinyPesa mobile payment solution by redesigning transaction flows and implementing advanced security features, resulting in a 25% increase in user adoption across 10,000+ active users.
- Redesigned UzaKitu e-commerce platform dashboard with D3.js data visualizations, enabling small businesses to track performance metrics and improve decision-making processes.
- Implemented WebSocket-based real-time order update system, reducing customer support queries by 40% and improving user satisfaction scores.
- Collaborated in an agile development environment, participating in daily standups, code reviews, and sprint planning sessions with cross-functional teams.

Blockchain Developer
Independent Research & Development | Remote
January 2022 – Present

- Developed a decentralized voting system using Ethereum smart contracts, JWT authentication, and real-time updates, ensuring transparent and tamper-proof electoral processes.
- Created verifiable voting records through implementation of industry-standard security practices and comprehensive smart contract auditing procedures.
- Built intuitive frontend interfaces using React and Web3.js for seamless blockchain interaction, improving user adoption by 60% during the beta testing phase.
- Implemented advanced access control mechanisms and input validation systems to prevent common smart contract vulnerabilities and security exploits.

Web Development Consultant
Self-Employed | Remote
January 2021 – Present

- Designed and developed performant, SEO-optimized websites for over 15 small businesses and startups, utilizing modern web technologies and best practices.
- Increased client online visibility by an average of 35% through implementation of responsive, accessible web designs and search engine optimization strategies.
- Provided comprehensive technical guidance on technology stack selection, architecture decisions, and implementation strategies tailored to diverse client requirements.
- Maintained long-term client relationships through delivery of ongoing updates, feature enhancements, and technical support services.

Education

Bachelor of Science in Business Computing
Jomo Kenyatta University of Agriculture and Technology | Nairobi, Kenya
Expected Graduation: 2025

- Relevant Coursework: Software Development, Database Management, Business Analysis, Systems Design
- Focus Areas: Software development methodologies, database optimization, and business process analysis
- Maintaining strong academic performance while gaining practical industry experience through internships and freelance projects.

Certifications

- Advanced React & TypeScript Patterns – Frontend Masters | March 2024
- Blockchain Developer Certification – Ethereum Foundation | June 2023
- Full Stack Web Development Nanodegree – Udacity | March 2022
- Modern JavaScript: ES6+ Complete Course – Zero To Mastery Academy | January 2022

Key Projects

Decentralized Voting Management System
Technologies: Solidity, Ethereum, React, Web3.js, JWT Authentication

- Developed a blockchain-based electoral system with transparent, secure voting processes and real-time vote counting capabilities.
- Implemented comprehensive voter authentication system with JWT tokens and eligibility verification through smart contracts.
- Created real-time vote counting interface with WebSocket integration for instant updates and transparent result reporting.
- Achieved 99.9% uptime during the testing phase with zero security vulnerabilities identified in smart contract audits.

AI-Integrated Portfolio Website
Technologies: React, TypeScript, Tailwind CSS, Framer Motion, AI APIs

- Built a responsive portfolio website with advanced animations and WCAG accessibility compliance, achieving a 98% Lighthouse score.
- Implemented a conversational AI assistant to enhance user experience and provide interactive project demonstrations.
- Utilized modern web technologies including Framer Motion for smooth animations and TypeScript for type safety.
- Optimized for performance with lazy loading, code splitting, and efficient asset management.

Achievements & Awards

- **User Adoption Achievement:** Increased TinyPesa mobile payment platform user adoption by 25% through strategic enhancements.
- **Client Satisfaction:** Maintained a 100% client retention rate as a web development consultant with an average project rating of 4.9/5.
- **Performance Optimization:** Reduced customer support queries by 40% through implementation of real-time update systems.
- **Business Impact:** Helped clients achieve an average 35% increase in online visibility through optimized web solutions.

Additional Information

- **Availability:** Open to remote, hybrid, or relocation opportunities globally
- **Work Authorization:** Kenyan citizen, eligible for work visa sponsorship
- **Professional Interests:** Fintech innovation, blockchain security, accessible web design, AI integration
- **Community Involvement:** Active contributor to open-source projects and blockchain development communities
