Professional Summary

Innovative Full Stack & Civic Tech Developer with 3+ years in blockchain, fintech, and accessible web applications. Proven ability to deliver secure, scalable platforms—voting systems, fintech wallets, and playlist conversion apps—using React, TypeScript, Solidity, and leading APIs. Recognized for agile teamwork, QA/security expertise, and a passion for civic and fintech solutions that drive real-world impact and adoption.

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT Auth
- **Blockchain/Web3:** Solidity, Ethereum, Web3.js, MetaMask, Smart Contracts, DApps
- **API Integration:** Spotify API, YouTube Data API, Google Custom Search, M-Pesa/Daraja API, Firebase
- **Database:** MongoDB, PostgreSQL, Firebase, Redis
- **DevOps:** Git, GitHub, Docker, AWS, CI/CD
- **QA & Security:** Freelance QA (Testlio), Cybersecurity Essentials, Networking, Troubleshooting
- **Other:** Agile, Remote Work, UI/UX Design, WCAG Accessibility

Professional Experience

Software Engineer Intern
Neverest Ltd (TAWA INNOVATE) · Nairobi, Kenya (Hybrid)
May 2024 – Present

- Improved TinyPesa's transaction workflows/security, boosting reliability and customer adoption.
- Upgraded UzaKitu's dashboard with interactive D3.js visualizations and real-time WebSocket tracking.
- Optimized Pickup Mtaani's delivery and payments integration for seamless logistics and order management.
- Worked in agile team; contributed to scalably delivering fintech/e-commerce solutions.

Independent Full Stack Developer & Consultant
Jan 2021 – Present

- Developed SoundSwapp, a modern playlist converter (Spotify↔YouTube) with React + TypeScript, OAuth2, Firebase; achieved 98%+ match accuracy for 5,000+ tracks.
- Engineered quota-aware Google CSE integration with API key rotation and caching, cutting API failures by 40% and boosting conversion reliability.
- Built dashboards and SEO-optimized SME sites, improving client online reach by 35%+.
- Achieved a 100% client retention rate and average project rating of 4.9/5.

Education

BSc in Business Computing
Jomo Kenyatta University of Agriculture and Technology (JKUAT) · Nairobi, Kenya
Expected Graduation: 2025

- Key coursework: Software Engineering, Distributed Systems, Database Optimization, Blockchain, Business Analysis, Data Visualization
- Practiced agile teamwork, peer code reviews, and real-life project management.

Certifications

- Freelancer Conduct Guidelines – Testlio (Jul 2025, 100%)
- Cybersecurity Essentials – Cisco Networking Academy (Jan 2025)
- HCIA-Datacom V1.0 – Huawei (Aug 2023)
- HTML Course – Sololearn (Jul 2017)

Key Projects

Blockchain-Based Electoral Management System (IEBC Kenya)
Solidity, Ethereum, React, Web3.js, Node.js

- Built secure, transparent electoral system with smart contracts and JWT-based voter authentication.
- Real-time vote counting with WebSocket interface; 99.9% uptime, zero audit vulnerabilities.

SoundSwapp Playlist Converter (Spotify ↔ YouTube)
React, TypeScript, Firebase, Google CSE, OAuth2

- Achieved 98%+ match accuracy, 5,000+ tracks, with quota-aware error handling and offline support.

AI-Integrated Portfolio Website
React, TypeScript, Tailwind CSS, Framer Motion, AI APIs

- 98% Lighthouse score, interactive AI assistant, and advanced animations.

Other Experience & Volunteering

- **Chief Technology Officer, Tech Hub Club (High School)**: Led student teams on coding projects/events.
- **First Aid Responder, St John Ambulance:** Provided emergency support at events (2018–2021).

Additional Information

- **Availability:** Open to remote, hybrid, worldwide relocation
- **Work Authorization:** Kenyan citizen (visa eligible)
- **Interests:** Fintech, blockchain, civic tech, AI integration, accessible design
- **Community:** Contributor to open-source projects and local/global tech forums
